Design principles

I wanted my page to be symmetrical because human eye is attracted more to symmetry than to asymmetry – it creates a sense of „calm“.

There is also a contrast between my background and text – background has light, soft colors while letters are black.

We can notice a repetition on my page – I used a pink bar when I wanted to write a description of image.

The arrangement of elements is balanced – I didn't wanted my page to look messy or jumbled. Main colors are light green and pink – I find them nice, pleasant and harmonious.

Interactive prototype – links:

Mobile: <https://xd.adobe.com/view/d1e26d0a-c69a-478a-b528-4f6d1f2db1a0>

Desktop: <https://xd.adobe.com/view/2547216b-3e66-4694-9a8d-07f9a9861c9a>

Planned changes:

Lines – I want to add more lines in the future, because it helps direct the eye and it also creates emphasis.

Framing – it can help highlight elements or crop images in interesting ways

Text color – I still want it to be in contrast with the background but I also want it to be more natural for my style of art (for example dark green).

I would also like to add some video or some interesting element to make my website more complicated and professional.
